- Manage the data base management software, Bluestep
- Make dashboards, graphs, and other user interfaces

EDUCATION

Utah Valley University, Orem Ut - *Bachelor's Degree in Computer Science*

August 2014 - Present

The UVU Computer Science department provides a broad range of programs that support students in many areas. Faculty members in the CS department represent years of experience in various related occupations and their academic credentials span an impressive variety of specializations. All members of the CS department work together to provide an educational experience designed to prepare graduates with the knowledge and skills required to succeed in the dynamic fields related to computer science.

Dev Mountain, Provo Ut - *Bachelor's Degree in Computer Science*

January 2014 - April 2014

This is where I learned to love coding! There was a lot of good energy here and while it definitely is not a comprehensive program, it gave me the tools and confidence to get to where I am today. We started with html and css and moved all the way into Angular and Node JS. While many of these projects are very simple they were highly educational.
